

Vetasi Facility Management Provider Accelerator

Pre-configured and integrated solutions

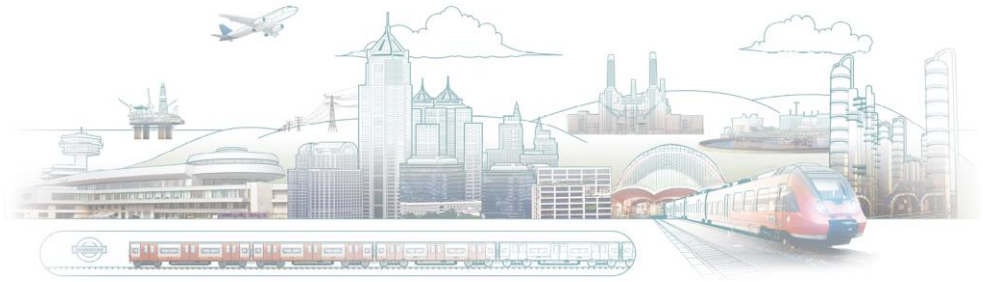

Facilities management solutions often fall into two categories. The first requires streamlining business processes for buildings, people and assets, while the second requires capabilities to maximise service levels while delivering excellent value and profitable engagements.

Converting from existing digital systems or manual processes can be challenging. Vetasi guides customers through the process to identify information flows best suited to achieving optimal business efficiencies.

Vetasi's Facility Management Provider accelerator provides a pre-configured and integrated solution of Maximo, Cognito FieldForce IQ mobile, Vetasi Accelerator templates, SFG 20 jobs and standard business process addressing the core facility management service provider value drivers.

Developed, in partnership with Cognito IQ, Vetasi FM Accelerator is based on extensive product knowledge and experience of major CAFM usage by companies like MITIE, ISS and JLL. Our Accelerator templates include commercial and Health & Safety compliance functions, as well as the delivery of hard facilities management services to multiple customers on a single platform to manage the full Asset Lifecycle and the associated costs.

Benefits include:

- Ensuring payment for all work carried out by a service provider for its customer
- More efficient information provision and data capture for field workers and front-line staff delivers higher operational data quality for management decisions and financial control
- Ensuring allocation of the right engineer to the job
- Improving first-time fix rate
- Greater efficiency through automation of receiving, planning and booking work
