

Vetasi are pleased to be supporting the next Maximo User Group meeting taking place on 29th September at **Coin Street Neighbourhood Centre**. Frank Baker, Vetasi's Operations Director is co-presenting with South East Water (SEW) and we would like to invite you to join us.

Vetasi are currently actively involved in two major UK based Maximo Spatial Implementations:

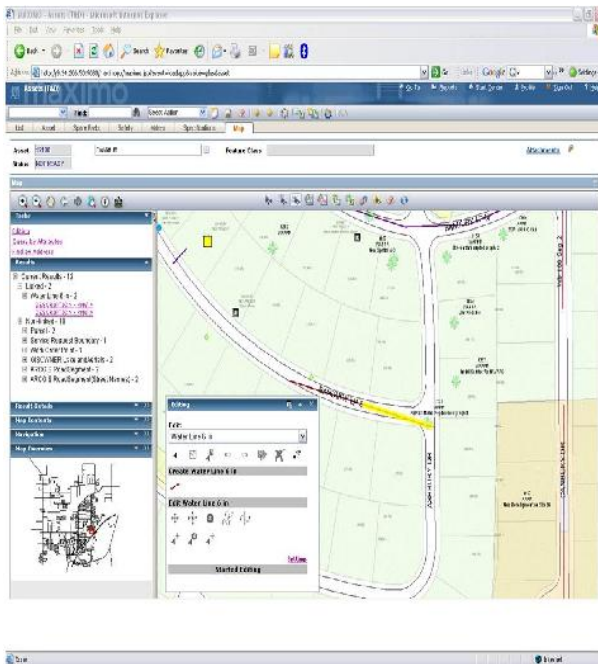

- **South Staffs Water - Vetasi are implementing Maximo for Utilities (including Spatial) at SSW. The project is currently in the final stages of UAT with a planned launch date of November 1st 2011.**
- **South East Water - Vetasi upgraded SEW from v4 of Maximo to Maximo Spatial v7 during the course of 2010. We are now assisting SEW in the final stage of this project to implement the full spatial integration with their ESRI based GIS. This project will go live early 2012**

The theme of the presentation will be:

How South East Water used Maximo Spatial and ESRI functionality to implement a Customer Metering Program

The Objective was to implement an IT solution to manage a £50 million Capital project installing 400,000+ meters in 9 years while ensuring Asset and Billing data is accurately and effectively managed.

The Challenge is to minimise the cost per meter installation while ensuring consistency of approach, excellent customer service and ultimately correct billing. The requirements of all stakeholders; the Customer; The Highways Agency; The Regulator and the Contractor must be combined together with the complex internal requirements of the Business to ensure a consistent approach.

About the Maximo User Group:

The Maximo User group offers an almost unique opportunity to meet up with other members of the Maximo User Community. It gives you the chance to discuss in an informal environment the challenges and benefits that other Maximo users are experiencing. There are usually a range of informative speakers - primarily from the user community - who will present an overview of their experiences with Maximo. There are also updates from the industry in terms of new features and releases coming along the way.

Hopefully we will have the opportunity to join you there and look forward to seeing you on the day.
